

EPICUTIS LIPID SERUM FORMULATION

Epicutis Lipid Serum is a simple, proprietary formulation containing just eight ingredients that provide a unique blend of highly concentrated actives without preservatives and other unnecessary ingredients. Led by novel technology developed at Princeton University, hero ingredient TSC formulated with sodium hyaluronate, will soothe your skin blocking inflammatory damage to promote healthier skin. Epicutis Lipid Serum will calm, plump and make your skin glow.

Key Ingredients:

- TSC (INCI name: Disodium Tetramethylhexadecenyl Succinoyl Cysteine)
 - Clinically proven to combat fine lines & wrinkles, reduce blemishes and promote skin texture/smoothness
 - Protects against collagen breakdown to maintain our skin's health
 - Promotes skin repair
 - Strong anti-inflammatory and antioxidant properties to calm the skin
- Sodium Hyaluronate
 - Naturally occurring fatty acid that promotes skin moisturization
 - Helps to keep skin barrier healthy
 - Provides structure and volume to skin
 - Hydrative properties help soothe the skin
